

# Player Classification

2010-2011

Players in the Midwest Coin Concepts Dart Leagues have been classified according to skill level. This classification insures that players who display the highest levels of skill, amongst all players, will be allowed to play against other players of like skill only. The classified player list will be included in all team packets. Please note if your name is bolded there has been a change in your classification, or you have been added to the list.

1) Teams with one or more players listed as **masters** players must play in the highest skill level available on that night of play for that game in that area.

(The league office may designate, or a league area may vote, to establish certain nights and/or games as "no master list player" nights of play.)

allowed to play lower than the second highest skill level available on that night of play for that game in that area. Teams with two or more **advanced** players may be placed in the highest level of play by the league office. **Decisions of the league office are final.**

3) Players listed as **master** players may not sub on any team other than those in the highest skill level available. Players listed as **advanced** players may not sub on any team lower than the second highest skill level available.

4) The penalty for non-compliance of these rules will be a **loss of all games played** by the offending player.

5) The classification of players on this list is designed for league play only. It does not directly apply to any tournament play.

6) The classified list no longer includes a separate classification for women. Leagues are now almost entirely mixed or open, eliminating the need to classify women separately.

IF YOU HAVE ANY QUESTIONS PLEASE CALL THE LEAGUE OFFICE AT  
1-320-258-5957 OR 1-320-258-5958 THANK YOU!
